PROFESSIONAL SUMMARY

Data Analyst and ML Practitioner with **2+ years** of experience building predictive models, running statistical analyses, and designing BI dashboards for business stakeholders. Built a **lead scoring model (85% accuracy, +23% sales conversion)**, customer segmentation clusters, a **churn prediction model (AUC 0.82)**, cohort analyses, and Power BI/Tableau dashboards used by senior stakeholders. Outside of work, designed and shipped **Pustakam AI**, a GenAI platform with multi-provider LLM orchestration and secure API architecture, now used to generate roughly **22 million words (~30M tokens)** of user content, and accepted into the Z.ai Startup Program. Also built **DashLint MCP**, an open-source Model Context Protocol server for AI-assisted dashboard creation. Comfortable with SQL and Python day to day, and with taking a problem from a stakeholder conversation through to a working dashboard, model, or pipeline.

FEATURED PROJECT: PUSTAKAM AI

GenAI Platform · React · Supabase · Multi-provider LLM APIs · Vercel

- Built and shipped a live GenAI platform (pustakamai.tanmaysk.in) that generates full-length structured books; accepted into the **Z.ai Startup Program**.
- Users have generated roughly **22 million words (~30 million tokens)** of content on the platform to date.
- Designed a **multi-stage LLM orchestration pipeline** (goal/audience analysis, roadmap generation, iterative chapter generation with checkpointing), with dynamic context-injection powering study features like doubt-solving and flashcard generation.
- Integrated **7 LLM providers** (GLM, Gemini, Mistral, Groq, Cerebras, OpenAI, xAI) through custom streaming (SSE) API clients, with rate-limit backoff and automatic fallback routing between providers.
- Built a **serverless API proxy** (browser -> proxy -> LLM provider) using Supabase JWT bearer tokens so platform API keys stay off the client, plus a **BYOK (Bring Your Own Key)** mode for users who want to use their own keys.
- Published the **Pustakam Educational Corpus** on HuggingFace: 1,091 AI-generated books, 23.7M+ words, 8 LLMs compared, CC-BY-4.0 licensed, for NLP and model-comparison research.

FEATURED PROJECT: DASHLINT MCP

Open-Source Model Context Protocol Server · TypeScript · Next.js · Vercel

- Built an open-source MCP (Model Context Protocol) server (dashlint.tanmaysk.in) that orchestrates dashboard creation for AI coding assistants, supplying schema-aware blueprints and visualization playbooks.
- Generates downloadable, fully interactive HTML dashboard applications through a live Next.js MCP endpoint.
- Designed the protocol integration so any MCP-compatible AI assistant (Cursor, Windsurf, Claude, etc.) can invoke dashboard workflows programmatically.

EXPERIENCE

Data Analyst | Capgemini, Noida

Apr 2024 - Present

Full-time

- Built a **Python-based** ETL/reporting pipeline automating data cleaning and transformation: reduced manual entry errors by **40%** and saved **10+ hours/week** across the team.
- Designed and maintained **8+ Power BI dashboards** (DAX, Power Query) across 3 business units (IT Operations, Service Delivery, Incident Management), translating business requirements into data models and delivering real-time KPI visibility to senior leadership.
- Standardised metric definitions and reporting frameworks across cross-functional teams: cut manual data extraction time by **30%** and improved data trust stakeholder-wide.

- Analysed incident and operational data in SQL to identify recurring failure patterns, enabling client teams to prioritise remediation across high-priority service tiers.

Data Analyst Trainee | Rubixe, Nagpur *Nov 2022 - Dec 2023*

Full-time

- Built lead scoring model (Random Forest) achieving **85% accuracy**: improved sales conversion by **+23%** and cut sales outreach effort by 15 hours/week.
- Developed K-Means customer segmentation model producing actionable clusters that directly shaped targeted marketing strategy for business stakeholders.
- Built predictive maintenance models on sensor data to identify equipment failure patterns **24-48 hours ahead of breakdowns**, reducing unplanned downtime.
- Designed Tableau dashboards translating ML outputs into clear business visuals for non-technical decision-makers.

OTHER PROJECTS

Customer Churn Prediction + Statistical Validation

Python · XGBoost · Scikit-learn · Statsmodels · Seaborn

- Churn pipeline (Logistic Regression, RF, XGBoost). Chi-square + t-tests ($p < 0.05$) for feature validation.
- **AUC 0.82**: identified 3 high-risk segments driving 60% of churn volume, enabling targeted retention campaigns.

SQL Cohort Retention Analysis

SQL · Window Functions · CTEs · DATE_TRUNC · LAG() · Python

- Pure-SQL cohort analysis using DATE_TRUNC, LAG(), and self-joins: zero Python dependency for core analysis.
- Key insight: Q4-acquired customers showed **35% higher** 6-month retention than Q1: directly reshaped marketing budget allocation.

SKILLS

Languages Python (primary) · SQL · R · JavaScript

Analysis & ML Pandas · NumPy · Scikit-learn · XGBoost · Random Forest · K-Means · Regression · Feature Engineering · Statistical Testing · A/B Testing · Cohort Analysis

Visualisation & BI Power BI (DAX, Power Query) · Tableau · Matplotlib · Seaborn

AI / GenAI Engineering Multi-provider LLM API integration · Prompt/context engineering · Streaming (SSE) · Rate-limit handling & fallback routing · Secure API proxy design · MCP Protocol

Databases & Backend SQL Server · PostgreSQL · MySQL · Supabase (Auth, RPCs, JWT) · Serverless functions

Cloud & Deployment AWS (Certified) · GCP · Vercel · Jupyter · Streamlit · Git/GitHub · FastAPI

EDUCATION

B.E. Mechanical Engineering *2019 - 2022*

Prof. Ram Meghe Institute of Technology & Research, Amravati University · CGPA 9.3 / 10.0

CERTIFICATIONS

- **AWS Cloud Technical Essentials** - Amazon Web Services (Dec 2024)
- **Certified Data Scientist** - IABAC (Sep 2023)
- **Google Data Analytics Foundations** - Google (2024)
- **DataMites Data Science Bootcamp** (2023)

BEYOND THE DESK

- Public GitHub with data analysis notebooks, ML pipelines, and automation scripts: github.com/tanmay-kalbande
- Published HuggingFace dataset: pustakam-edu-corpus
- Portfolio blog documenting analytical methodologies: tanmaysk.in
