PROFESSIONAL SUMMARY

Data Analyst with **2+ years** of experience building predictive models, running statistical analyses, and designing BI dashboards for business stakeholders. Built a **lead scoring model**, customer segmentation clusters, a **churn prediction model**, cohort analyses, and Power BI/Tableau dashboards used by senior stakeholders. Outside of work, designed and shipped **Pustakam AI**, a GenAI platform with multi-provider LLM orchestration and secure API architecture, now used to generate over **35 million words** of user content, and accepted into the Z.ai Startup Program. Also built **DashLint MCP**, an open-source Model Context Protocol server for AI-assisted dashboard creation. Comfortable with SQL and Python day to day, and with taking a problem from a stakeholder conversation through to a working dashboard, model, or pipeline.

FEATURED PROJECT: PUSTAKAM AI

GenAI Platform · React · Supabase · Multi-provider LLM APIs · Vercel

- Built and shipped a live GenAI platform (pustakamai.tanmaysk.in) that generates full-length structured books; users have generated over **35 million words** to date, and it was accepted into the **Z.ai Startup Program**.
- Designed a **multi-stage LLM orchestration pipeline** (roadmap generation, iterative chapter generation with checkpointing) and integrated **7 LLM providers** through custom streaming (SSE) clients with rate-limit backoff and automatic fallback routing.
- Built a **serverless API proxy** using Supabase JWT tokens so platform API keys stay off the client, plus a **BYOK (Bring Your Own Key)** mode for users who prefer their own keys.
- Published the **Pustakam Educational Corpus** on HuggingFace: 1,091 AI-generated books, 23.7M+ words, 8 LLMs compared, CC-BY-4.0 licensed.

FEATURED PROJECT: DASHLINT MCP

Open-Source Model Context Protocol Server · TypeScript · Next.js · Vercel

- Built an open-source MCP (Model Context Protocol) server (dashlint.tanmaysk.in) that orchestrates dashboard creation for AI coding assistants, supplying schema-aware blueprints and visualization playbooks.
- Generates downloadable, fully interactive HTML dashboard applications through a live Next.js MCP endpoint.
- Designed the protocol integration so any MCP-compatible AI assistant (Cursor, Windsurf, Claude, etc.) can invoke dashboard workflows programmatically.

EXPERIENCE

Data Analyst | Capgemini, Noida

Apr 2024 - Present

Full-time

- Built a **Python-based** ETL/reporting pipeline automating data cleaning and transformation, reducing manual entry errors and weekly manual effort across the team.
- Designed and maintained **8+ Power BI dashboards** (DAX, Power Query) across 3 business units (IT Operations, Service Delivery, Incident Management), translating business requirements into data models and delivering real-time KPI visibility to senior leadership.
- Standardised metric definitions and reporting frameworks across cross-functional teams, reducing manual data extraction effort and improving data trust stakeholder-wide.
- Analysed incident and operational data in SQL to identify recurring failure patterns, enabling client teams to prioritise remediation across high-priority service tiers.

Data Analyst Trainee | Rubixe, Nagpur *Nov 2022 - Dec 2023*

Full-time

- Built a **lead scoring model** (Random Forest) and a K-Means customer segmentation model that helped sales and marketing teams prioritise outreach and target campaigns.
- Built predictive maintenance models on sensor data to flag equipment failure patterns **24-48 hours ahead of breakdowns**, reducing unplanned downtime.
- Designed Tableau dashboards translating ML outputs into clear business visuals for non-technical decision-makers.

OTHER PROJECTS

Customer Churn Prediction + Statistical Validation

Python · XGBoost · Scikit-learn · Statsmodels · Seaborn

- Churn pipeline (Logistic Regression, RF, XGBoost). Chi-square + t-tests ($p < 0.05$) for feature validation.
- Identified **3 high-risk customer segments** driving a large share of churn, enabling targeted retention campaigns.

SQL Cohort Retention Analysis

SQL · Window Functions · CTEs · DATE_TRUNC · LAG() · Python

- Pure-SQL cohort analysis using DATE_TRUNC, LAG(), and self-joins: zero Python dependency for core analysis.
- Key insight: Q4-acquired customers retained noticeably better at 6 months than Q1, informing marketing budget allocation.

SKILLS

Languages	Python (primary) · SQL · R · JavaScript
Analysis & ML	Pandas · NumPy · Scikit-learn · XGBoost · Random Forest · K-Means · Regression · Feature Engineering · Statistical Testing · A/B Testing · Cohort Analysis
Visualisation & BI	Power BI (DAX, Power Query) · Tableau · Matplotlib · Seaborn
AI / GenAI Engineering	Multi-provider LLM API integration · Prompt/context engineering · Streaming (SSE) · Rate-limit handling & fallback routing · Secure API proxy design
AI-Assisted Development	Cursor · OpenAI Codex · Claude Code · MCP Protocol
Databases & Backend	SQL Server · PostgreSQL · MySQL · Supabase (Auth, RPCs, JWT) · Serverless functions
Cloud & Deployment	AWS (Certified) · GCP · Vercel · Jupyter · Streamlit · Git/GitHub · FastAPI

EDUCATION

B.E. Mechanical Engineering *2019 - 2022*

Prof. Ram Meghe Institute of Technology & Research, Amravati University · CGPA 9.3 / 10.0

CERTIFICATIONS

- **AWS Cloud Technical Essentials** - Amazon Web Services (Dec 2024)
- **Certified Data Scientist** - IABAC (Sep 2023)
- **Google Data Analytics Foundations** - Google (2024)
- **DataMites Data Science Bootcamp** (2023)

BEYOND THE DESK

- Public GitHub with data analysis notebooks, ML pipelines, and automation scripts: github.com/tanmay-kalbande
- Published HuggingFace dataset: pustakam-edu-corpus
- Portfolio blog documenting analytical methodologies: tanmaysk.in
